INCIDENT MANAGEMENT

T E A M

Letter from GFC Incident Commander:

To: All West Mims Fire Personnel:

As a Georgia Forestry Commission Type 2 Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated.

Guidelines on inappropriate behavior both “on Duty” and “off Duty” while assigned are addressed within each agencies policies. Our Team expects all incident personnel to follow established government policies for behavior along with all Illegal drug and alcohol directives.

Our Incident Management Team endorses and supports an attitude of mutual respect for all personnel and the public we serve.

We expect a strong work ethic and an attitude of Safety at all times!
Sincerely,

/s/ Buck Kline
Incident Commander
Georgia Forestry Commission Type 2 Incident Management Team

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY SHIFT 0800-2000	
WEST MIMS	Date/Time From: 05/03/2017 0800 WED	Date/Time To: 05/04/2017 0800 THU
3. Objective(s):		
<ul style="list-style-type: none"> • Provide for the safety and security of incident personnel and public in all incident operations through sound risk assessment and hazard mitigations. • Maintain a positive working relationship with all adjacent landowners, cooperators State and Federal partners. Inform, involve and communicate incident planning and operations with all partners. • Confine all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible. • In cooperation with local timberland owners, use full suppression strategies and tactics to minimize damage to private timberlands and improvements and to prevent fires outside the Refuge from entering the Refuge. • Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Unified Incident Commanders. • Protect all cultural and archeological sites and structures within the refuge. • Manage the fires cost-effectively consistent with the values at risk. • Implement structure protection as necessary for at-risk facilities and communities. • Coordinate suppression actions with assigned Refuge Resource Advisors to protect endangered species. • Conduct all operations in a harassment-free environment. There will be a no tolerance atmosphere for harassment, alcohol, or illegal drug use. Everyone will be treated with dignity and respect. 		
4. Operational Period Command Emphasis:		
Keep fire within the Okefenokee Refuge Swamp Edge Break Boundary. Respond to initial attack fires on new starts within: *South of Suwannee Canal *Within the Okefenokee jurisdictional boundaries *Within state properties inside Perimeter Road *North of GA 94/FL 2		
General Situational Awareness:		
Utilize; confine, contain, and point source protection strategies and tactics that commit operations personnel only where and when they can be successful, under conditions where important values at risk are protected with the least exposure.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Today's temperatures, relative humidity, and dispersion will be similar to yesterday. Winds will nearly reverse themselves today and fire behavior will follow suit. East winds in the morning will push fire against the west swamp edge break. Later, winds rotate to a southeast direction. Areas of most concern today are the entire west swamp edge break, the north end of Billy's island, and northwest corner of Chesser Island.

Fuel moistures and ERC's continue to be at record levels. Fire has burned much of what is available for consumption at this time within the planned containment area. Nevertheless, as the weather continues to be hot and dry, those areas that haven't carried fire previously will, at some point, become prone to fire spread.

For today expect maximum rates of spread to be 30-40 chains/hour and maximum flame lengths to be 8-10 feet. Good ventilation will allow for increased fireline intensity, similar to yesterday.

SPECIFIC:

DIV A/O: Backing fire will continue to burn between Soldier Island and the swamp edge break to the southeast where fuels will allow. On the west portion of DIV A, watch for re-burn along the perimeter.

DIV B/C: Re-burn will likely be an issue in these divisions today. With east winds, flare-ups along the west perimeter in DIV C may cause containment issues.

DIV D/E: Residual heat along Hwy 177 from yesterday's burnout operation will cause flare ups near the containment lines. In the interior, Billy's Island will continue backing south. ESE winds may cause flare up on north end that could threaten containment along the canal.

DIV M/N: ESE winds today will push heat away from containment lines today. Residual heat along containment lines is likely, especially on the southern portion where intense fire behavior was exhibited yesterday.

AIR OPERATIONS:

Fire behavior and weather are unlikely to impact air operations today.

SAFETY

Wind increased or changes directions. The winds of this fire have changed almost daily and today is no exception. Winds will nearly reverse themselves and come out of the east southeast. What does that mean to you? Your division? Your tactics?

SAFETY MESSAGE

WEST MIMS FIRE

May 3, 2017 0800 to May 4, 2017 0800

Wisdom is not a belief, a value, or a set of facts. Wisdom is an attitude taken towards knowledge, belief, information, abilities and skill. “Wisdom” is the quality of having expert knowledge accompanied by an understanding that what one knows is usually incomplete and fallible, and that acting on that fallible knowledge involves a tricky balance between knowing and doubting. This is risk management.

On this incident, the accident with the greatest probability of occurring is unsure footing i.e. slips and falls. The greatest potential of loss is an incident involving a vehicle accident.

Sure footing is accomplished when you have appropriate balance, 1) as you walk and/or step onto or over obstacles and 2) when using fire tools and equipment. Being in good physical condition is critical when working and walking in the incident fire zones.

To reduce the risk injury/accident from a driving mishap drive defensively and with seat belts fastened. Do a walk around before moving vehicle. On long trips take periodic breaks.

Logging Activity: Division Charlie will have multiple logging contractors on Council road. Stay away from their cutting site. Watch for reburn potential in area. Watch for trucks and equipment on roads. Watch for trucks enter and exiting off HWY 94. Use L.E. if needed.

Standard Firefighting Order #10—Fight fire aggressively, having provided for safety first.

Watch Out Situation #5—Uninformed on strategy, tactics, and hazards.

If you don't have an education, you have to use your brain.

Safety Officers: Ricky Holbrook, Chris Church, Carson Jones, Phil Perkins, Steve Smestad, John McGee, Tommy Hawkins, Mickey Bunton

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
Ground Transport:			
<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar

Training Specialist Message

The following contains information for both trainee and trainer/evaluators regarding the incident training program. The information is to assist you in planning your activities.

- 1) Trainee and Mentor/Evaluator register with Training Specialist (TNSP)
- 2) It is not necessary to be assigned to the incident as a trainee to receive credit for your assignment. If you have an open task book initiated by your home unit take the opportunity to accomplish tasks and receive credit.
- 3) It is only necessary to follow up with the TNSP during your assignment if you have any significant issues i.e. Changes in assignment/trainer problem with assignments etc.
- 4) Trainer and evaluator **MUST** “close out” with TNSP prior to Demob. The closeout process involves:
 - ✓ The trainer completing an individual performance evaluation (ICS 225/226)
 - ✓ The trainee will complete an exit interview form. Forms are available at the TNSP desk
 - ✓ The evaluator should have all work completed in the position taskbook at the time training assignment closeout. Including a recommendation as to the recommendation of the assignment i.e. recommend certification, needs more assignments, etc.
- 5) If you have reached a point where as much work can be done in the book as possible on this incident, you may perform the close out process with the TNSP prior to Demob which could save you time and a potential wait in line.

Collector for ArcGIS- Mobile Mapping App

Instructions

Situation Unit and GISS have implemented use of the Collector app for mobile mapping on the West Mims Fire. There are two types of users: Collector and Viewer. Anyone assigned to the incident can view mobile maps, and some will be designated to collect new data using the mobile maps. The data collected using Collector can be served directly to the Situation Unit as proposed. All new data must then be reviewed and approved by the Situation Unit Leader before it will show up on printed map products.

You must have an ArcGIS Online (AGOL) account to login to the Collector app for viewing or collecting. Many agencies have their own accounts. If you have an agency account, you can provide your account username to your DIVS. They will then provide that information to SIT.

If you don't have an AGOL account, you can request an account through the NIFC organization for AGOL using the following web link: <http://nifc.maps.arcgis.com/home/index.html>

You will receive an email to activate your account. After you receive your user name and set up your password, you can then provide your user name to your DIVS, and they will submit it to SIT.

If you need training on how to download maps for offline use in the field, let your DIVS know. **TIP:** When using Collector in the field turn your mobile device on airplane mode to save battery life.
